| Prerequisites (required courses and introductory requirements)   |  |   |                 |                         |       |                       |                          |          |   |                  |   |
| Required courses   | none   |   |                 |                         |       |                       |                          |          |   |                  |   |
| Introductory requirements  | Basic knowledge of microeconomics and statistics   |   |                 |                         |       |                       |                          |          |   |                  |   |
| Assessment method, forms and criteria  |  |   |                 |                         |       |                       |                          |          |   |                  |   |
| Assessment method  | Course completion (graded)   |   |                 |                         |       |                       |                          |          |   |                  |   |
| Assessment criteria  | <p>Student's presence at the meetings, active participation in the in-class experiments and problem solving (group work) - up to 60% of the grade</p> <p><u>Behavioural experiment prepared and executed by the group of students</u> (the experiment should be prepared by two or three students together; first an appropriate questionnaire for researching some behavioural problems or aspects of economy should be prepared and discussed with other students; then students should perform the research and present the results) &amp;minus; up to 40% of the grade. The grading is based on the quality of the project, quality of performance during presentation. The quality will be assessed on following basis:</p> <ul style="list-style-type: none"> <li>- innovation approach 50%,</li> <li>- reliability and realistic approach 30%,</li> <li>- attractiveness and clearness of presentation 20%</li> </ul> |   |                 |                         |       |                       |                          |          |   |                  |   |
| Course objectives  |  |   |                 |                         |       |                       |                          |          |   |                  |   |
| <p>Making students aware of the main findings of the behavioural economics.</p> <p>Training students in the use of the behavioural tools and methods useful in solving day to day economic questions and problems.</p> |  |   |                 |                         |       |                       |                          |          |   |                  |   |
| Learning outcomes  |  |   |                 |                         |       |                       |                          |          |   |                  |   |
| Knowledge  | E1_W01   | The student possesses basic knowledge of the nature and importance of behavioural economics and its place in social sciences and can describe the links between achievements in these fields, knows main findings of behavioural economics. |                 |                         |       |                       |                          |          |   |                  |   |
|  | E1_W03   | The student possesses basic knowledge of the relations between social structures and institutions and norms in the decision making process.   |                 |                         |       |                       |                          |          |   |                  |   |
|  | E1_W09   | The student knows basic economic connections and governing rules discovered by behavioural economics.   |                 |                         |       |                       |                          |          |   |                  |   |
|  | MSG1_W01   | The student has an advanced knowledge of behavioural Economics and its place in the system of sciences, including within related disciplines.   |                 |                         |       |                       |                          |          |   |                  |   |
|  | MSG1_W09   | The student has knowledge about human beings behaviour with regard to making economic decisions, acting within social structures and organisational units or conducting individual economic activity.                                       |                 |                         |       |                       |                          |          |   |                  |   |
|  | E2_W01   | The student has an in-depth knowledge of the nature of behavioural economics and its  |                 |                         |       |                       |                          |          |   |                  |   |

|          |  |   |
|----------|--|---|
|          |  | place in the system of sciences; understands the differences between contemporary trends in economic thought; knows the claims of contemporary behavioural theories.  |
| E2_W03   |  | The student possesses basic knowledge of the relations between social structures and institutions and norms in the decision making process.   |
| MSG2_W01 |  | The student possesses basic knowledge of the nature and importance of behavioural economics and its place in social sciences and can describe the links between achievements in these fields, knows main findings of behavioural economics. |

| Skills   |  |   |
|----------|--|---|
| E1_U01   |  | The student can correctly interpret and explain economic and social phenomena, analyse their causes, course and connections between these phenomena using the acquired knowledge of behavioural economics.  |
| E1_U02   |  | The student is able to analyse correctly the causes and course of particular social processes mainly economic, political and social decisions through the behavioural economics prism.  |
| E1_U08   |  | The student is able to observe, understand and analyze economic and social phenomena and processes using adequate methods of behavioral economics   |
| E1_U10   |  | The student is able to prepare oral presentations, in English in the field of behavioral economics, using specialized terminology, theoretical approaches, principles of collecting various sources data, their description and interpretation as well as inference on the basis of scientific literature, can actively participate in the debate |
| MSG1_U01 |  | The student can correctly interpret and explain economic and social phenomena, analyse their causes, course and connections between these phenomena using the acquired knowledge of behavioural economics.  |
| MSG1_U02 |  | The student can assess economic and social phenomena occurring in an open economy using methods and tools applied in behavioural economic.  |
| MSG2_U01 |  | The student can creatively interpret and explain complex and unusual economic phenomena and relations between them, using their knowledge in the field of behavioral economics  |
| MSG2_U02 |  | The student can assess economic and social phenomena occurring in an open economy using methods and tools applied in behavioural economic.  |
| E2_U01   |  | The student can correctly interpret and explain economic and social phenomena, analyse their causes, course and connections between these phenomena using the acquired knowledge of behavioural economics.  |
| E2_U02   |  | The student can use acquired knowledge to describe and analyse the causes and course of economic and social processes and phenomena, and can formulate his/her own opinions and critically select data and analysis methods based on the achievements of behavioural economics.   |
| MSG2_U14 |  | The student is able to prepare oral presentations, in English in the field of behavioral economics, using specialized terminology, theoretical approaches, principles of collecting various sources data, their description and interpretation as well as inference on the basis of scientific literature, can actively participate in the debate |
| E2_U10   |  | The student is able to prepare oral presentations, in English in the field of behavioral economics, using specialized terminology, theoretical approaches, principles of collecting   |

**Course contents**

**Module 1: Rational decision making**  
 Decision making under conditions of risk and uncertainty,  
 Decision tree  
 Expected value,  
 Expected utility,  
 Petersburg paradox,  
 Case studies on practical use of the expected value.

**Module 2: Induction to the behavioural economics**  
 Von Neuman and Morgenstern theory,  
 Bounded rationality,  
 Preferences and economic motives of people,  
 Role of leading motives,  
 Reduced rationality of human economic choices,  
 Reduced rationality or different levels of rationality?  
 Behavioural economics in relation to the main stream economics.

**Module 3: System 1 and System 2**  
 How do we take decisions,  
 Automatic decisions and intuition,  
 Effort required to take conscious decisions, depletion effect,  
 Priming effect,  
 Cognitive ease,  
 Looking for explanations- coherent stories and norms,  
 Halo effect,  
 WYSIATI,  
 Question substituting

**Module 4: Heuristics and fallacies**  
 Affect heuristic,  
 Small numbers fallacy,  
 Availability heuristic,  
 Anchoring,  
 Representativeness heuristic,  
 Regression fallacy,  
 Framing,  
 Overconfidence and loss aversion:  
 Illusion of validity,  
 Planning fallacy,  
 Pervasive optimistic bias,  
 Sunk costs fallacy.

**Module 5: Prospect theory**  
 A neutral reference point - "adaptation level"  
 A principle of diminishing sensitivity in the evaluation of changes of wealth,  
 Loss aversion versus risk seeking,  
 Bad versus good choices,  
 Certainty and possibility effect,  
 Non-linear weighting of probabilities: for instance Prelec's function,  
 Endowment effect

**Module 6: Altruism**  
 Reciprocal altruism,  
 Altruism as an investment in cooperation,  
 Devotion as a part of altruistic behaviors,  
 Altruism as an investment,  
 Genders and altruistic approach.

**Module 7: Experiments and praxis**  
 Designing a behavioural experiment,  
 Discussing and finetuning the experiment concept,  
 Conducting the experiment,  
 Presentation of the research outcomes of the student's experiments and discussion

| Assessment criteria  | <p>Students are obliged to prepare a project on a given topic. The specific topic must be approved by the lecturer. The project should analyse specific problem, should include data, facts, tables, and graphs and final conclusions.</p> <p>During the presentation of their project, students should demonstrate knowledge of contemporary economic policy issues and be able to discuss these problems.</p> |  |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
| Course objectives  |   |  |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
| The aim of the subject is to improve students' knowledge about setting levels of taxation, government budgets, money supply, as well as about labour market policy, income inequalities, national ownership, and many other areas of government interventions into the economy. The main focus is on contemporary issues of economic policy. |   |  |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
| Learning outcomes  |   |  |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
| Knowledge  | E1_W01  | A student obtains general knowledge about the aims and measures of economic policy.                          |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
|  | E1_W02  | A student knows about the argumentation for government intervention in economy.                              |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
|  | MSG1_W01  | A student has an advanced knowledge of economic sciences, in particular of contemporary economic policy.     |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
|  | MSG1_W02  | A student has an advanced knowledge and understanding of the economic relations in the contemporary economy. |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
|  | E2_W01  | A student understands the differences between contemporary trends in economic policy.                        |                 |                         |                  |                         |                             |                      |                      |                    |               |  |
|  | MSG2_W03  | A student knows and understands the regularities governing economic policy.                                  |                 |                         |                  |                         |                             |                      |                      |                    |               |  |

**Course contents**
**1. Controlling system structure**

The idea of controlling (definitions, dimensions, applications, cases). Functions of controlling process. Components of the controlling as a cybernetic system. Attributes and relations between the controlling and the controlled processes. Controlling centers. Case study.

**2. Planning key performance indicators (KPI's) as targets to achieve or keep based on flexible budgeting**

The idea of KPI's as targets to achieve and to keep. The method of flexible budgeting. The structure of the flexible budget spreadsheet. System of financial and non-financial KPI's. Calculations of KPI's. Case study.

**3. Measuring and identifying variance on controlled process including profitability of products or companies based on rolling budgeting**

The idea of rolling budgeting. The structure of rolling budgeting spreadsheet. The identification of absolute and relative

variance on controlled indicators. The hierarchy of profitability of products/SBU's. Propositions of corrective decisions based on the hierarchy of products/SBU's profitability. Case study.

4. Variance analysis

Qualitative/quantitative methods and tools to identify the variance significance. The calculation of confidence interval for controlled parameters. The application of statistical test for the identification of variance significance. Case study.

5. Statistical process control (SPC)

Six sigma. Shewhart control charts. Process flow diagram. Ishikawa diagram. Pareto diagram. Check-sheet. Scatter plot. ABC analysis.

| Assessment criteria   | During the completion of first-cycle studies, as part of the subject "Economics in Academic Tutoring," a student may participate in one, single-semester tutorial. Recruitment for the classes takes place twice during an academic year - before the beginning of the winter semester and before the start of the summer semester. Students apply for the classes with a tutor based on a separate procedure, independent of the enrollment for elective subjects. The rules of the tutorial are established between the student and the tutor leading the tutorial. The evaluation is in accordance with the Study Regulations. |   |                 |                        |                         |                          |                    |                      |                      |                    |               |  |
| Course objectives   |   |   |                 |                        |                         |                          |                    |                      |                      |                    |               |  |
| The aim of the course is to deepen the student's knowledge, skills, and competencies in the subject matter of the tutorial. |   |   |                 |                        |                         |                          |                    |                      |                      |                    |               |  |
| Learning outcomes   |   |   |                 |                        |                         |                          |                    |                      |                      |                    |               |  |
| Knowledge   | E1_W01  | The student has advanced knowledge in social sciences and is proficient in using universal economic terminology.                      |                 |                        |                         |                          |                    |                      |                      |                    |               |  |

**Course contents**

1. Introduction to tutoring. Establishing the rules of the classes, forming a contract with the student.
2. Determining the theme of the tutorial in line with the presented offer and the interests of the student.
3. Application of educational tools to support the selection and deepening of the chosen subject matter.
4. Planning the tutoring process - identifying the goal/goals.
5. Setting and discussing the scope of tasks and the expected outcomes of the tutorial.
6. Tutoring work (an ongoing process), including:
  - selection and analysis of literature, preparation of materials related to the undertaken theme
  - identification of existing problems
  - presentation of one's arguments.
7. Discussion of the completed tutoring project.

**Recommended reading lists**

| Assessment criteria   | During the completion of second-cycle studies, as part of the subject "Economics in Academic Tutoring," a student may participate in one, single-semester tutorial. Recruitment for the classes takes place twice during an academic year - before the beginning of the winter semester and before the start of the summer semester. Students apply for the classes with a tutor based on a separate procedure, independent of the enrollment for elective subjects. The rules of the tutorial are established between the student and the tutor leading the tutorial. The evaluation is in accordance with the Study Regulations. |  |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
| Course objectives   |  |  |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
| The aim of the course is to deepen the student's knowledge, skills, and competencies in the subject matter of the tutorial. |  |  |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
| Learning outcomes   |  |  |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
| Knowledge   | E2_W01   | The student has an in-depth knowledge of social sciences and understands the differences between contemporary economic thought streams.                                    |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
|   | E2_W03   | The student possesses in-depth knowledge about the relationships between phenomena and economic organizations operating both in the domestic and international spheres.    |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
|   | MSG2_W01   | The student has in-depth and well-organized knowledge in the field of economic sciences.   |                 |                         |                  |                         |                          |                      |                      |                    |               |  |
|   | MSG2_W03   | The student knows and understands the types of economic ties, comprehends the conditions, and principles of market functioning in both national and international aspects. |                 |                         |                  |                         |                          |                      |                      |                    |               |  |

**Course contents**

1. Introduction to tutoring. Establishing the rules of the classes, forming a contract with the student.
2. Determining the theme of the tutorial in line with the presented offer and the interests of the student.
3. Application of educational tools to support the selection and deepening of the chosen subject matter.
4. Planning the tutoring process - identifying the goal/goals.
5. Setting and discussing the scope of tasks and the expected outcomes of the tutorial.
6. Tutoring work (an ongoing process), including: - selection and analysis of literature, preparation of materials related to the undertaken theme - identification of existing problems - presentation of one's arguments.
7. Discussion of the completed tutoring project.

**Recommended reading lists**

Basic Literature:

Publications consistent with the tutorial theme indicated by the tutor.

Supplementary Literature:

B. Karpińska-Musiał, Personalized Education at the University. Ideology - Institution - Didactics - Mentor. Libron Publishing House, Kraków 2016.

In the Quest for Quality in Quantity. Oxford Tutoring at the University of Gdańsk. Ed. B. Karpińska-Musiał. Libron Publishing House, Kraków 2016.

Good Academic Practices in Natural Sciences. Ed. J. Bolałek, E. Szymczak, T. Sadoń-Osowiecka. Libron Publishing House, Kraków 2015.

| This course objective is to provide students with different perspectives on contemporary economics. Lectures will be presented by visiting professors from different countries showing regional perspectives on the most important economic problems in the context of the global economy, geo-political considerations, local economic culture, and international influences. The lectures will comprise the on-site and virtual learning components. |   |  |                 |                        |                         |                         |                          |                      |                      |                    |               |  |

**Course contents**

**The overall 30h will be delivered by several visiting professors in the mix of online and on-site meetings. The full topic content will be completed by Feb. 28th (subject to confirmation of our guest lecturers).**

**The idea is to present interesting economic problems, so the scope will be broad but the main theme is how the modern economy works, why it works that way, and what can be done to improve it.**

**Recommended reading lists**
**Basic literature :**

- 1) WTO, Understanding WTO 2015, available at [https://www.wto.org/english/thewto\\_e/whatis\\_e/tif\\_e/understanding\\_e.pdf](https://www.wto.org/english/thewto_e/whatis_e/tif_e/understanding_e.pdf)
- 2) list to be completed Feb 28th

**Suggested literature:**

- 1) O'Brien, R. and Williams, M., 2016, *Global political economy: Evolution and dynamics*. Macmillan.5th, Chapter 6 (will be sent via email)
- 2) list to be completed Feb 28th

**Course contents**

1. Introduction to strategic management
2. Market segmentation
3. Long term market strategy for simulated company

4. Introduction to simulation software
5. New product introduction techniques
6. Development of communication strategies
7. Loyalty and satisfaction research

| Assessment method   | Course completion (graded)  |  |                 |                         |       |                          |                 |               |   |                  |   |
| Assessment criteria   | To complete the course, the student has to accumulate at least 21 points. Student is awarded with points for:<br><br>- group work in-class activities (max 20 points),<br>- quizzes and tests online at fixed dates outside of class (max 10 points),<br>- assignments: two tasks to be solved individually outside of class within given deadline (max 20 points),<br>- high attendance (max 10 points). |  |                 |                         |       |                          |                 |               |   |                  |   |
| Course objectives   |   |  |                 |                         |       |                          |                 |               |   |                  |   |
| The purpose of this course is to help students develop advanced skills for formulating and analyzing mathematical models in the economics and finance. Rigorous mathematical analysis of theoretical models can lead to a better understanding of economic problems.<br>Additionally, the purpose is to help students develop skills for using the computer tools to solve mathematical models and to apply the knowledge in economic modeling. |   |  |                 |                         |       |                          |                 |               |   |                  |   |

**Course contents**

1. Review of basic linear algebra: determinants and matrix inverses; Cramer's rule; rank of matrix; linear systems of equations; degrees of freedom. All tasks in this topic are conducted in a computer laboratory.
2. Linear programming: basic properties and examples of linear programs; basic solutions; the fundamental theorem of linear programming; the simplex method; dual linear programs. This topic is conducted with computer laboratory support.
3. Non-linear programming: constrained optimization with equality constraints (Lagrange problem) and with inequality

constraints (Kuhn-Tucker problem).

4. Differential equations: constant coefficient linear differential equations; qualitative solution: phase portrait diagrams; nonlinear systems; fixed points; linearization of dynamic system in the plane. This topic is conducted with computer laboratory support.

5. Difference equations: review of difference equations; linear difference equations; non-linear difference equations and phase diagram.

6. Optimal control: maximum principle; transversality conditions.

7. Dynamic programming: dynamic programming problems; the principle of optimality; the value function; Bellman equation.

8. Stochastic processes: Markov chains; stationary distributions. This topic is conducted with computer laboratory support.

**Course contents**
**I. Sharing Economy concept and passenger transport**

(history of a sharing economy concept, growth factors, features, conditions, challenges, sharing economy market)

**II. Ride sharing as a part of the sharing economy**

(sharing economy in transport sector, transport modal split, EU policy, sustainable development, urban transport problems, passengers behaviour and preferences)

**III. Shared mobility as an innovation in passenger transport**

(innovative concepts of passenger transport: electric vehicles, autonomous vehicles, sustainable transport management and organisation, key IT solutions supporting passengers, shared mobility, Mobility as a Service -MaaS concept)

**IV. Car as a non-private mode of transport**

(car-sharing, car-pooling, business models, ridesharing mobile applications - the usage, new markets, legal issues, impact on modal split)

**V. Bike sharing**

(definition, history and market growth, impact on environment and public health, financing, enablers and barriers to popularization for introduction and popularization (e.g. infrastructure, weather conditions, fleet rebalancing))

**VI. E-scooter sharing and moped sharing**

(shared e-scooters mopeds as a complementary mode of urban transportation, market growth, the infrastructure problems, fleet rebalancing problem in comparison to the bike-sharing services)

**VII. Impact of shared mobility on passenger transport in urban areas**

(identification of factors influencing changes in passenger's behaviour, travel time savings as a motivation, transport external costs' reduction as a positive effect of introducing shared mobility)

**Course contents**
**1 An Introduction to Sociology**

- 1.1 What Is Sociology?
- 1.2 The History of Sociology
- 1.3 Theoretical Perspectives

**2 Sociological Research**

- 2.1 Approaches to Sociological Research
- 2.2 Research Methods
- 2.3 Ethical Concerns

**3. Media and Technology**

- 3.1 Technology Today
- 3.2 Media and Technology in Society
- 3.3 Global Implications of Media and Technology
- 3.4 Theoretical Perspectives on Media and Technology

**4. Global Inequality**

- 4.1 Global Stratification and Classification
- 4.2 Global Wealth and Poverty
- 4.3 Theoretical Perspectives on Global Stratification

**5. Government and Politics**

- 5.1 Power and Authority
- 5.2 Forms of Government
- 5.3 Politics in the United States
- 5.4 Theoretical Perspectives on Government and Power

**6. Work and the Economy**

- 6.1 Economic Systems
- 6.2 Globalization and the Economy
- 6.3 Work in the Europe and United States

**7. Population, Urbanization, and the Environment**

- 7.1 Demography and Population
- 7.2 Urbanization
- 7.3 The Environment and Society

**8. Social Movements and Social Change**

- 8.1 Collective Behavior
- 8.2 Social Movements
- 8.3 Social Change

**Course contents**

1. Theoretical basis of communication: definition of communication, communication process and its participants, features and conditions of effective communication, definition and principles of message formulation, forms of information exchange.
2. Strategies and channels of communication.
3. Principles of verbal communication: semantic principles of communication, secrets of careful listening.
4. Non-verbal communication principles: non-verbal communication channels - body language.
5. Communication styles and types of behavior in the communication process: aggressive attitude, has, assertive.
6. Disturbances and barriers in the communication process: semantic, psychological, environmental and physical barriers, conflict and ways to solve it.
7. Manipulation in the communication process: the impact of emotions on the communication process.
8. Rules for the preparation of a good presentation.
9. Communication during recruitment, how to prepare a CV.
10. Cultural conditions of business communication.
11. Golden rules of communication - student presentations.
12. Final test.

**Recommended reading lists**

**Course contents**

1. Introduction to ERP systems:
  - 1.1. Characteristics of ERP systems
  - 1.2. Architecture of ERP systems
  - 1.3. Main vendors of ERP solutions
2. General information about SAP AG and its products

3. Introduction to GBI study
4. Navigation in SAP ERP
5. Materials Management module in SAP ERP (case study):
  - 5.1. Introduction to MM study
  - 5.2. Creating new records in master data
  - 5.3. Creating purchase requisitions and requests for quotation
  - 5.4. Maintaining quotations from vendors
  - 5.5. Creating purchase orders and goods receipts
  - 5.6. Verifying physical receipts
  - 5.7. Posting payment to vendors
6. Production Planning module in SAP ERP (case study):
  - 6.1. Introduction to PP study
  - 6.2. Creating and changing records in Material Master
  - 6.3. Changing routing
  - 6.4. Creating SOP (Sales and Operation Plan)
  - 6.5. Running Master Production Schedule
  - 6.6. Creating production orders
  - 6.7. Confirming production completion
  - 6.8. Receiving goods from production orders
  - 6.9. Review of costs assigned to production orders

**Course contents**
**1. The process of urban development**

- 1.1. Cities in a historic context
- 1.2. Process of urban growth: industrial cities
- 1.3. Process of urban growth: post-industrial cities, resilient and sustainable cities

**2. City as a system**

- 2.1. Functions of the city
- 2.2. Stakeholders in the city
- 2.3. Conflicts in the city

**3. Cities: between micro and macro levels of economics**

- 3.1. Theories of local economic development
- 3.2. Economic models of urban structure
- 3.3. Drivers of local economic performance

**4. Urban competitiveness**

- 4.1. Defining urban competitiveness
- 4.2. Quality of life
- 4.3. Workshop: Review of rankings of urban competitiveness

**5. Strategy of development - programming development of the sustainable city**

- 5.1. Strategic planning
- 5.2. Selected methods of strategic planning
- 5.3. Workshop: Review of selected strategies of development

**6. Scenarios of sustainable urban development**

- 6.1. The scenario concept
- 6.2. Scenarios in urban planning & development
- 6.3. Workshop: Evaluation of scenarios

**7. Selected urban systems: housing**

- 7.1. Real estate market
- 7.2. Housing policy
- 7.3. Housing and architectural design

**8. Selected urban systems: logistics and mobility**

- 8.1. Urban transport system
- 8.2. Urban goods mobility
- 8.3. Urban passenger mobility

**9. Selected urban systems: public utilities**

- 9.1. Water supply

- 9.2. Sewage management
- 9.3. Heating and energy

**10. Urban environmental policy**

- 10.1. Environmental impact of urban development
- 10.2. Environmental limits of growth
- 10.3. Scenarios of the environmental adjustment - workshop

**11. Urban transformations**

- 11.1. The nature of the urban space
- 11.2. The transformation processes
- 11.3. Workshop - evaluation of the selected cases on urban transformations

**12. Metropolitan areas**

- 12.1. The process of metropolisation
- 12.2. Factors determining metropolisation process
- 12.3. Workshop: evaluation of selected metropolitan areas

**13. Challenges of urbanised world**

- 13.1. Challenges facing contemporary cities
- 13.2. Models of the future city
- 13.3. International networks of cities and regions
